THE AQUA TECHNICS *Story*

It was back in August of 1976 that Aqua Technics first opened for business.

Right from day one, we knew that if we wanted to be the leading swimming pool manufacturer in WA, we also had to lead the way with product development and technology. So we began burning the midnight oil, researching new manufacturing methods and materials.

And we have been ever since.

That's why, when you visit an Aqua Technics Swimming Pool Technology Centre, you can expect to see more than just the run-of-the-mill pools on display. What you'll discover is the largest range of technologically advanced, award-winning swimming pools in Australia.

Pools designed and manufactured right here in WA to suit local conditions.

So it's no coincidence that Aqua Technics has grown into one of Australia's largest swimming pool companies while still maintaining all the values you would expect from a WA family owned and operated company.

We stand behind our pools so you can take the plunge with confidence, knowing that you have invested in the very best swimming pool available - ***a pool built stronger to last longer*** from the team at Aqua Technics.

THE AQUA TECHNICS *Edge*

FADE FREE

Available with patented Pool ColourGuard® technology, guaranteeing pool colour that will not fade*.

PRECISION MOULDS

All moulds are built to exacting tolerances. The edge beams are true, the shapes geometrically perfect and the surface finish is without peer.

QUALITY ASSURED

Certified to build to AS/NZS 1838 under license BMP 520101, we are measured and tested by an authorised, independent auditor. We also comply with the ISO 9001 Quality Management System.

SUPERIOR STRENGTH

The support structures built in as part of the manufacturing process ensure the pool is independently structural and eliminate the need for secondary engineering works. New high-strength, corrosion resistant fibreglass produces a stronger, stiffer pool – up to 20% stronger.

LIFETIME WARRANTIES

Pool ColourGuard® Lifetime Interior Surface Guarantee and Extended Lifetime Structural Warranty - our commitment to providing extended warranties above those standard in the SPASA contract.

SUPERIOR MATERIALS

New generation, high performance, eco-friendly fibreglass with exceptional strength and stiffness. Daily batching of materials at our on-site gelcoat manufacturing facility means a better product. Only specialty materials are used – no general purpose products.

ANTI-MICROBIAL PROTECTION

Microtech Anti-Microbial Pool Protection guards the pool's surface against the growth of bacteria, making it exceptionally hygienic and safer for your family.

MADE IN WA

All pools are individually made to order to suit local conditions at our new, state-of-the-art Jandakot manufacturing facility, the largest pool production premises in WA.

*Conditions apply.

FIRST-CLASS MANUFACTURING *Facility*

Our brand new Jandakot production facility is the largest in Western Australia. Purpose-built for the manufacture of fibreglass swimming pools, it allows us to build a technologically superior product of the highest quality.

Each of our pools is manufactured in accordance with a Quality Management System as per the requirements of the International Standard ISO 9001. The strength of our pools is backed by an Extended Lifetime Structural Warranty and the world's first Lifetime Interior Surface Guarantee* with every Pool ColourGuard® pool.

We can proudly boast to having our own gelcoat production division with two in-house industrial chemists. We are able to freshly batch our gelcoats on a daily basis, allowing them to be modified to suit ambient weather conditions, producing a better product.

EXPERIENCE TO MATCH

Aqua Technics has been manufacturing fibreglass swimming pools for 40 years so you can trust we have the knowledge and expertise to build the best swimming pool available today. We have been a WA family owned and operated company since we first began. Pools are an important family pastime so it's only natural that a successful swimming pool company should be a family business. We pride ourselves on having the best range of designs, colours and surface finishes. We have been leading the industry in technology and development to ensure that every Aqua Technics pool is superior in every way. Our pools are built to stand the test of time and are distributed all over WA, the Eastern States and parts of the world through our extensive dealer network.

Our promise to you – there is no better swimming pool

*Conditions apply.

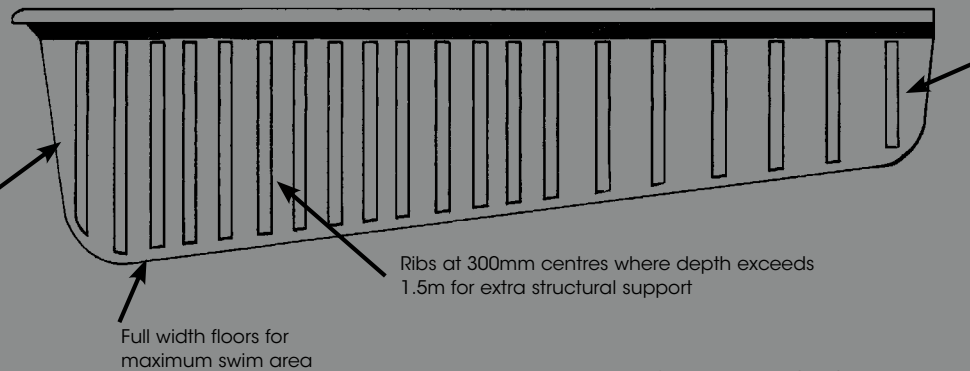

POOLS BUILT TO AUSTRALIAN *Standards*

Obtaining accreditation to build a fibreglass pool to the Australian Standard 1838:1994 means being measured and tested by an authorised, independent auditor. This accreditation is not easily achieved. Anyone can say they build to or above the Australian Standard. For your peace of mind, always ask for a license number – ours is BMP 520101.

POOL STRUCTURE

Full depth walls* for maximum swim area

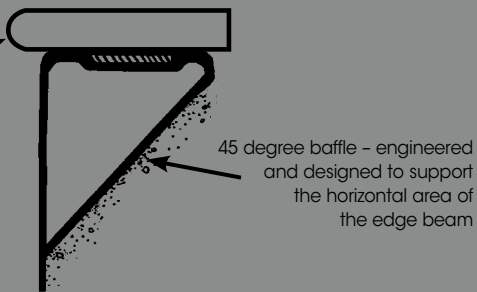

Full-size ribbing system reinforces the pool and makes it structurally independent when installed in a sandy hole, eliminating the need for secondary engineering works.

Fibreglass support struts under benches, seats and swim outs ensure they remain level with the rest of the pool and improve its strength and integrity.

EDGE BEAM DETAIL

Standard 200mm edge beam, designed so the pool is structurally sound without having to add secondary engineering works*, such as a concrete ring beam.

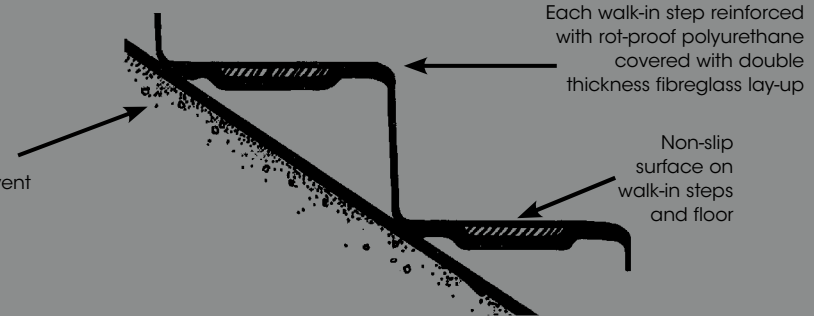

Pavers designed to fit perfectly, with no concrete ring beam needed, so no chance of cracking through expansion at different rates. Most paving companies have designed their pool headers to fit 200mm edge beams.

STEP REINFORCEMENT

Steps fully supported on backfill, which can easily and effectively be placed around the pool to sustain the entire pool structure. Without the support structures, it would be impossible to ensure the backfill is consolidated under the step area.

Underside of walk-in steps fully enclosed with fibreglass to prevent voids in backfill

*Excludes pools with a safety ledge. #Individual site conditions should be referred to local engineers or authorities for verification.

OUR MEDALS *of Distinction*

Aqua Technics is proud to have received numerous industry awards over the years including Swimming Pool and Spa Association (SPASA) Awards of Excellence, both locally and nationally.

We were the first company in Western Australia to win the prestigious Australian DesignMark and since then have added a string of them to our collection.

Aqua Technics has even received International Awards of Excellence from the Association of Pool & Spa Professionals (APSP), proof that the quality of our pools is recognised worldwide.

Pool ColourGuard®
Advanced Technology in Fibreglass Swimming Pools

we dare you to
compare

Pool COLOURGUARD® with a Lifetime Interior Surface Guarantee*

Available with our award winning range of fibreglass pools, Pool ColourGuard® is the world's only patented surface protection system that guarantees the colour **will not fade**.

Incorporating patented technology and backed by a **Lifetime Interior Surface Guarantee**,* a pool with Pool ColourGuard® offers the following benefits:

POOL COLOUR THAT DOES NOT FADE WITH A LIFETIME INTERIOR SURFACE GUARANTEE*

Even after years of regular use the pool is guaranteed to look as good as the day it was installed. The extensive range of fibreglass surface finishes is now protected from colour loss and weathering.

SUPERIOR DEFENCE AGAINST CHEMICALS AND WATER

Pool ColourGuard® offers pool owners a far greater level of comfort. Accidental and unintended readings of low pH and high chlorine levels will not harm the pool's brilliant colour or textured finish.

BRILLIANT HIGH GLOSS FINISH

A pool with Pool ColourGuard® has a brilliant, high gloss finish never before seen on swimming pools. Pool ColourGuard® imparts a very high gloss to the pool's surface which is maintained year after year.

WITHSTANDS THE EFFECTS OF UV RAYS

Pool ColourGuard® acts like sunscreen on your pool. It's ability to withstand UV radiation has been tested and proven. Special ultra violet absorbers and inhibitors are incorporated in the Pool ColourGuard® process to dramatically minimise any degradation of the surface by ultra violet light.

The result is a swimming pool that is available in brilliant, vivid colours that will not be bleached by chlorine, oxidised by chemicals or degraded by the effects of ultra violet rays. Only a pool with Pool ColourGuard® can offer you all of this.

Harmony

WA'S LARGEST *Range*

Aqua Technics has been the leader in swimming pool design and technology for over 38 years. Our range of technically superior fibreglass and ceramic composite pools are sought after worldwide for their quality and unique design attributes.

Our award-winning range includes traditional kidney shapes through to contemporary, geometric designs created to complement today's modern architectural styles. Every pool in our range is available in a wide selection of surface finishes including Pool ColourGuard® and Crystite®, both with the world's first Lifetime Interior Surface Guarantee. Our extensive range of stunning, vibrant colours makes matching your pool to your outdoor living space easy.

Whether you are looking for a design the kids can make a splash in, a style more suited to exercise and lap swimming or one that you can simply relax and cool off in on a hot summer's day, we have the perfect pool for you. Browse our range over the following pages and take your pick. If you find it hard to choose, our experienced Sales & Design Consultants can offer expert advice to ensure you get the pool that suits you best.

SPASA WA Pool of the Year

SPASA WA Awards of Excellence

SPASA WA Awards of Excellence

COMMERCIAL *Pools*

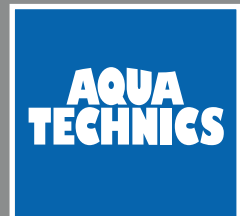

For as long as we have been installing our pools into the backyards of WA families, we have also been completing commercial projects, both big and small.

Our commercial division has installed pools all over Western Australia, from the very far north down to the Lord Forrest Hotel in the south-west and across to the east. If you have ever been to Cable Beach Resort in Broome you would have spent many an hour relaxing in their beautiful concrete swimming pools, built by Aqua Technics Commercial.

We specialise in both concrete and fibreglass commercial pools and spas and have completed projects for the following applications:

- Public swimming pools and aquatic centres
- Residential complexes including apartments
- Health and fitness centres
- Resorts and hotels
- Water features
- Water parks
- Purpose-built custom designs

Our commitment to quality in both design and workmanship was rewarded when we received the WA Pool of the Year award at the Swimming Pool and Spa Association Awards of Excellence. We also recently received gold for our custom designed fibreglass pool and spa at the stunning Berkeley River Lodge.

LANDSCAPING & *Accessories*

When you buy the very best pool there is, you want the very best landscaping and accessories to go with it. Imagine finishing your new pool with stylish paving, planter boxes filled with your favourite plants, a soothing waterfall feature and modern glass fencing together with advanced automatic pool equipment that works cleverly to reduce your pool maintenance and operating costs.

Aqua Technics can offer a complete pool and landscaping package with attention to every last detail. From recommendations and advice right through to installation, Aqua Technics can assist you with:

- State-of-the-art pool pumps, filters and automatic cleaners
- Pool heating including gas, electric and solar systems
- Landscaping design services
- Waterfalls and water features
- Headers and paving
- Fencing

For all the extras, simply speak with one of our expert Sales & Design Consultants.

GETTING *Started*

Once you have selected the perfect pool from our huge range of award-winning swimming pool models, the good news is the hard part is over! Aqua Technics will take it from here and make all necessary arrangements on your behalf with a commitment to guiding you right through the entire process.

Once a site inspection is completed Aqua Technics will take care of Shire and Water Corporation approvals and paperwork on your behalf.

A template of your pool is laid out on the ground and the site is excavated by a bobcat.

Your new pool is carefully lowered in by crane and checked to ensure it is perfectly level.

We backfill around your pool and connect the pump, filter and electrics.

The water goes in!

The landscaping is completed and a handover conducted where we show you how everything works and how to care for your pool.

POOL BUYER'S *Checklist*

- Is your pool builder accredited to AS/NZS 1838:1994 and ISO 9001 Quality Management System? Always ask for a license number.
- Is your pool builder using Pool ColourGuard® technology for pool colour guaranteed not to fade?
- Is your pool manufactured in WA to suit local conditions?
- Does your pool have full-size structural ribs along the walls, making it independently structural?
- Does your pool have a 200mm full-size edge beam, making it structurally sound without having to add secondary engineering works?
- Are the bench, seat and swim out areas adequately supported and can easily be backfilled?
- If there is a large entry area, are there integrated support struts that form part of the structure in the design?
- Does your pool have full depth walls and full width floors for maximum swimming area?
- Are all fittings fibreglassed to the shell to eliminate leaking and provide additional structural integrity?
- Does your pool builder have an onsite gelcoat manufacturing facility, with daily batching for a better product?
- Does your pool builder have an onsite, fully qualified industrial chemist to oversee product quality?

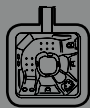

POOL DESIGNS - QUICK REFERENCE *Guide*

Our quick reference guide makes selecting the right pool to fit your outdoor area easy as can be. All of our designs are ordered from smallest to largest, so all you need to do is choose the one that is the perfect fit for your backyard. Length and width measurements are internal to the waterline.
